Mandatory Water Use Restrictions in Effect **Effective Immediately**

No **Nonessential** use of water is allowed between the hours of 9 am - 5 pm. Nonessential use refers to watering of grass, washing of cars, driveways etc. Water can still be used during these times for watering of vegetable gardens, farming use and, business purposes.

Our water withdrawal permit requires us to implement water restrictions when stream flows drop to a certain level for more than 3 consecutive days. The purpose of this restriction is to limit use of water during the highest evaporation time of the day for non essential uses.

Additional restrictions may be implemented in the future if needed. If you have any questions, please contact the Lunenburg Water District Office at 978-342-9211
